Palmer and Sicard

At Palmer and Sicard, we exceed client expectations every day. The company is 100-percent employee-owned, therefore every employee is an “owner” with a vested interest in customer satisfaction. **Our team of employee owners work together in a highly collaborative environment to be one of the best mechanical contracting firms in New England.** At Palmer and Sicard we help you keep your business moving forward.

Exceptional attention to detail, quality workmanship, dependable customer service, and pride of ownership are core values of our business. We guide our clients from concept through successful finished product by tailoring each project schedule, budget, and deliverable to meet our client’s specific needs.

Building mechanical systems is our specialty but we believe that the most important thing we can build is relationships with our customers. Through the years, hundreds of schools, hospitals, office complexes, manufacturing plants, hotels, municipalities, and active living retirement communities have put their trust in Palmer and Sicard. Whether handling design/build or plan & specification projects, our talented team of experts has the skills, technology and experience to meet any challenge.

State-of-the-art machinery and technology provides the customized solutions you need.

We would love to hear about your project goals, contact us today.

Customized Solutions to meet your needs

Our Sheet Metal and Welding Professionals work with a variety of gauges and materials using some of the most sophisticated sheet metal production machinery and technology available to provide the customized solutions you need. Palmer and Sicard fabricates all of your ductwork to your exact specifications maintaining the highest industry quality standards. **By keeping our production schedule fluid, our shop can respond in a quick, efficient, and highly cost effective manner.**

Our highly experienced team is ready to assist you ensuring attention to every detail from order-to-delivery. We are able to work with electronic data files, sketches, samples or fabrication lists to meet the customer requirements.

Let us show you why so many companies have partnered with Palmer and Sicard to provide their mechanical systems for more than six decades.
